Appropriate engineering controls
Handle in accordance with good industrial hygiene and safety practice. Wash hands before
breaks and at the end of workday.

Personal protective equipment
The type of protective equipment must be selected according to the concentration and
amount of the dangerous substance at the specific workplace.

Eye/face protection: Use equipment for eye protection tested and approved under
appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection: Handle with gloves. Wear suitable gloves. Chemical protection gloves are
suitable, which are tested according to EN 374. Wash and dry hands.

Body Protection: Complete suit protecting against chemicals, flame retardant antistatic
protective clothing.

Respiratory protection: Where risk assessment shows air-purifying respirators are
appropriate use (US) or type ABEK (EN 14387) respirator cartridges as a backup to
engineering protection, use a full-face supplied air respirator. Use respirators and
components tested and approved under appropriate government standards such as NIOSH
(US) or CEN (EU).
