
baseclick and Teubio Join Forces to Revolutionize Nucleic Acid Bioconjugation and labeling.

This partnership represents a significant milestone in advancing the field of nucleic acid bioconjugation and labeling, providing researchers with unprecedented access to cutting-edge tools and solutions. With baseclick's expertise in click chemistry and Teubio's extensive portfolio of high-quality reagents, the collaboration aims to provide scientists with tailored solutions for precise and efficient nucleic acid modification.

"We are excited to partner with Teubio to bring our innovative nucleic acid labeling technologies and products to researchers in France," said Dr. Thomas Frischmuth CEO of Baseclick. "This collaboration underscores our commitment advancing scientific discovery by providing researchers with the tools they need."

baseclick's portfolio of nucleic acid labelling solutions complements Teubio's extensive experience in life science research, enabling researchers to leverage a wide range of applications such as PCR, in situ hybridisation, RNA/DNA detection and more.

Romain Goulay (CSO, Teubio) says "We're pleased to welcome baseclick as a partner of Teubio and look forward to providing researchers throughout Europe and the UK access to these exciting new labeling technologies."

About baseclick:

baseclick is a leading provider of innovative nucleic acid labeling technologies based on click chemistry. With a focus on precision, efficiency, and versatility, Baseclick offers a wide range of customizable solutions for nucleic acid bioconjugation, enabling researchers to explore the complexities of DNA and RNA with unprecedented accuracy. baseclick's reagents and services in oligo and mRNA modification support research from bench to bedside.

About Tebu Bio:

Teubio facilitates Life Sciences Research every day, contributing to advance Science for a brighter future. Through our local offices located across Europe, we support Life Sciences and Biotechnology Researchers with a unique, holistic range of solutions enabling them to access cutting-edge solutions sourced from reputed global Life Sciences suppliers, carefully selected by our Scientific Team for their relevance and evaluated for their ethical and legal compliance.
